Achieving sustainable tourism

The natural, historical, cultural and other resources for tourism are conserved for continuous use in the future, while still bringing benefits to the present society.

2 Tourism development is planned and managed so that it does not generate serious environmental or socio-cultural problems in the tourism areas.

2 The overall environmental quality of tourism areas is maintained and improved where needed.

2 A high level of tourist satisfaction is maintained so that tourist destinations will retain their marketability and popularity.
